**Flag:** Follow up

Tony,

Would you like me to work with our Admin to set up a meeting or will you be taking the lead to do that?

Thanks

*Michael J. Szerlog*, Deputy Director

I agree – we can certainly support the LUB GWMA (analyses, QA, risk assessment, modeling, hydrogeology) but I would want to be sure we have the support of the divisions whose FTE we are using. Michael, can you work with Tony to get a meeting set up between us and the other divisions (OOO, WD, ECAD)?

Anthony,

Morning. Linda is out on leave this week and next. I can check in with the team, however, I think your approach of setting up a meeting with the WD and ECAD leads would be a good next step. Let me know if you would like our Admin to help with setting up a meeting?

Thanks

Linda et al,

I am continuing to monitor the work on the Lower Umatilla Basin nitrates issue. A recent discussion with ODEQ left me wondering what role LSASD and/or ORD might offer to take on, how the work would be scoped, and what it would look like for the state to request such help, such as reviewing or further data collection and study/analysis of area hydrology, water supply, etc.

Perhaps we can loop in WD and ECAD leads (Mat Martinson, Jeff Kenknight, and Peter Contreras) to have a short and informal check in sometime in the next few weeks.

**Subject:** LUB GWMA Briefing to OW Leadership

Good Morning Dan and Lauris,

Attached are the materials that I plan to send to HQ to set-up the meeting with OW Leadership. The briefing document has already been reviewed by ECAD and ORC (Jeff, Cara and Clarke), and I've incorporated all of the input the provided.

We plan to give a joint presentation, but since this is an OW request, I propose to lead off the framing and summary, unless Region 10 leadership has different thoughts or preferences.

If you have no suggested edits, shall I forward to Chris Hladick for his review? Or do one of you prefer to do so?

Thanks,  
Mat
